

COS - pH Control Crossover Switch

The COS - pH Control Crossover Switch was specifically designed to be used in applications where both CO₂ and acid are used to control pH. The COS allows for a simple flip of switch to change from using acid to CO₂. There is no need to unplug one feeder and plug in a different feeder.

INPUTS

Power

115 VAC, 1 phase, 60 Hz
(from controller)

OUTPUTS

Outlets

Individually powered, grounded outlets
rated at 15 amps

(To feed systems:)

- Acid
- CO₂

WARRANTY

AquatiControl Technology (ACT) warrants equipment of its manufacture and bearing its identification to be free of defects in workmanship and material. ACT's liability under this warranty extends for a period of one year from date of delivery from our factory or authorized distributor. It is limited to repairing or replacing any device or part which is returned, transportation prepaid, to the factory within one year of delivery to the original purchaser, and which is proven defective upon examination.

WARRANTY (cont.)

ACT disclaims all liability for damage during transportation, for consequential damage of any nature, for damage due to handling, installation or improper operation, and for determining suitability for the use intended by the purchaser.

ACT makes no warranties, either expressed or implied, other than those stated above. No representative has authority to change or modify this warranty in any respect.
