NSF/ANSI STANDARD 50 LISTING FOR POOL SALT

The original focus of the National Sanitation Foundation/American National Standards Institute's (NSF/ANSI) Standard 50 covered equipment used in recreational water facilities. However, in 2017, the standard was updated to address the health effects of recreational water treatment chemicals. This is to inform you that SureSoft[®] Pool Salt, ProSoft[™] Pool Salt and Sifto[®] Pool Salt were evaluated against the updated standard and now carry the NSF/ANSI Standard 50 Listing.

Sincerely,

A handwritten signature in black ink that reads "Geoffrey A. Brown".

Geoffrey A. Brown
Dir., Corporate Quality Assurance
