

# Quikblox FRP Conquest Starting Platform

## Standard Product Codes:

52-400 Low Profile, **Quikblox** Conquest Starting Platform w/ Anchor 12" Deck to water configuration  
52-4050 Mid Profile, **Quikblox** Conquest Starting Platform w/ Anchor 7" Deck to water configuration  
52-410 High Profile, **Quikblox** Conquest Starting Platform w/ Anchor Zero Deck to water configuration ( flush Gutter )

## General Description:

**Quikblox** Conquest Starting Platforms are solely designed and engineered to be use on competitive commercial swimming pools that follow FINA, NCAA and/or USA Swimming rules and regulations. **Quikblox** Conquest Starting Platforms are specify engineered to be retrofitted to **any existing starting platform anchor currently installed into an existing pool deck or bulkhead.**

## Specification:

### 1. Platform Tops

- **Quikblox** Conquest Starting Platforms track-start tops are 32" long by 24" wide. Platform top allows for optional adjustable and removable kick plate system.
- **Quikblox SeaDek** non-skid, closed cell PE/EVA platform surface provides exceptional traction and superior shock absorption, even when wet. Non-skid grip is a UV protected non-absorbent foam, featuring a textured micro-dot surface for enhanced non-slip easy to clean characteristics.

### 2. Platform Pedestal

- **Quikblox** Conquest Starting Platform top and base are constructions of 100% non-corrosive FRP fiberglass combined with ISO 9002 isophthalic resins and marine grade gel-coat exterior. Large contoured base sets flush to pool deck or bulk head eliminating platform movement such as bounce, rocking, wobble or springing effect.
- Backstroke bar and Rear Step bracket are constructed of powder coated Aluminum. Rear footplate constructed of 100% non-corrosive Polyurethane with CNC Machined slip resident pattern.
- **Quikblox** Conquest Starting Platforms are available in three(3) standard heights:

Low, Mid and High profiles. Each engineered to fit all types of deck to water heights, meeting FINA, NCAA and USA Swimming regulations

### 3. US Patented **Rotational** Anchor System

- The **Quikblox** anchor is constructed of marine grade 304L stainless steel. Patented design eliminates the need for pool deck demolition. Split-wedge anchor is designed to set inside any existing starting platform anchor, expanding tightly against the inside wall, eliminating movement. Anchor head swivels left to right 10 degrees to ensure starting blocks obtain **PERFECT ALIGNMENT** to the front of the Pool wall. They are then tightened through side access slot in Pedestal. **Quikblox** is the only starting Platform in the World with this Rotational feature!

## Optional Adjustable Track-Start Kickplate:

52-425- Fully Adjustable Track Start Kickplate System is constructed of Powder coated Aircraft non-corrosive Aluminum and specifically engineered for **Quikblox** Conquest Starting Block tops with multi position adjustability. Quickly adjusted or removed by the swimmer for Relay events.

## Other Optional Features:

52-420 - Optional Powder coated Side Handles

52- 440 Optional Custom FRP Gelcoat Colors, base and platform top

52-450 Optional Custom Vinyl Graphics (Team Logo or Sponsorship) per each graphic
